

Humboldt Curriculum Cycle CTE Team Board Report Annual Reflection for 2018-19

Date: 6/3/2019

Team Facilitator: Tom Johnson

Content Area: CTE

Highlights of tasks/accomplishments/products created/materials adopted:

The Humboldt Ag-Ed Department and the Humboldt Health Science Department both went through the RPP review process. The process allowed the departments to reflect on their strengths and weaknesses and receive feedback from the department of education. The process was a long one. Both Mrs Reekers and Mr Johnson attended several work sessions to learn about the process put on by the RPP group and then to complete the form and find the data that was needed to be submitted. The review was completed by December and the results of the process were given back and shared with the instructors at the end of April. The CTE team was updated on the process and the steps of what to expect as they will all have to go through the review over the next five year period. The evidence collected was the report submitted and data collected from the DE.
