

Humboldt Curriculum Cycle Annual Reflection for 2016-17

Date: June 1, 2017

Team Facilitator: Tom Johnson

Content Area: CTE

Identify this year's focus in any of these areas:

Curriculum: (IA Core Work or Content Standards)

Instruction: (AIW Connections)

Assessment: (Formative and/or Summative)

Resources: (Technology and/or Other) -

Focus was on the Department of Education's CTE redesign. The team also looked at the reintroduction of a CORE 9th grade course and researched the type of curriculum that would be used for such a course.

Alignment: (Vertical or Horizontal)

List any new learning:

New program review in CTE redesign will be every 5 years will be extensive. All programs will need to work on meeting the requirements set forth by the new code.

Highlights of tasks/accomplishments/products created/materials adopted:

CTE members met monthly and researched multiple vendors for curriculum material for the core course. The course curriculum is still in development with the basic outline set with the CTE team still in discussion on the possibility of an online or book vendor need.

The team met and budgeted Perkins funds for the CTE departments according to the guidelines. Departments submitted proposals that were discussed and approved that met needs of HHS students.

The DE CTE redesign was the main focus for our team. The main redesign has an impact on the number of CTE program areas and how those programs will be approved. The team spent time evaluating our programs of study and how they met the current standards and where they need to be improved.
